

We Reach Out to Others...

Sisters Jean Brigham, a registered occupational therapist, and Pamela McKinley, a licensed physical therapist assistant, are co-founders and care directors for **Family Tree Home Care**. They have been servicing the elder population of Worcester and Middlesex Counties for over 50 years combined. They have worked in the allied health field for many years, with extensive experience in geriatric rehabilitation and health care.

Their experiences have created a greater sensitivity to health issues, disabilities, limitations, and the importance of the family network. They work closely with other members of medical teams so they are comfortable establishing relationships with doctors, physical assistants, nurses, and hospice teams.

Our mission is to be an excellent source for clients, family, and facilities when an elder is in need of home care services.

Our vision is to meet the needs of each client we serve in a dignified, professional, and dependable manner.

Family Tree Home Care makes every effort to target and meet the needs of all clients and their families. The result is good care, comfort, confidence, and peace of mind.

Who We Are ...

Our purpose is to provide the highest quality of home care for seniors and other loved ones.

Since 1999, **Family Tree Home Care** has been servicing elders in both Worcester and Middlesex counties.

We offer carefully selected and trained caregivers who have been screened, with personal and professional references, and have also passed criminal background and nurse registry checks.

Our caregivers provide reliable, professional, and compassionate care to elders in their homes, assisted living facilities, retirement communities, and nursing homes.

They provide care 2 to 24 hours a day, as well as provide transportation to doctor's appointments, radiation/chemotherapy treatments, day surgeries, shopping, and social events. **Family Tree Home Care** can also provide live-in services.

We are proud to say that many of our caregivers have worked for **Family Tree Home Care** for years and have also provided services to the same clients for as long as nine years.

When you choose **Family Tree Home Care**, it is truly our family taking care of yours!

We Offer Peace of Mind ...

*"Across the miles from Illinois to Massachusetts, I rest comfortably knowing my mom has a true advocate in **Family Tree Home Care**. I truly believe that mom has been able to remain in assisted living due, in great part, to the care, compassion, and love she has received from **Family Tree Home Care**."*

— Marijane, IL

***Family Tree Home Care** has provided safe and professional transportation for both my father and mother to physician appointments since 2004. During this time, it has been a tremendous relief to know that I can always count on their assistance in accommodating our hectic schedules.*

— Linda, Worcester, MA

*We will be forever grateful to **Family Tree** for allowing our grandmother to live her final years in the happy and familiar surroundings of her own home with compassionate and caring companions.*

— Karen, Chatham, NJ

***Family Tree Home Care** has been working with my great aunt for the past six years. They have been patient, attentive, and expert in their approach to this challenge.*

— Frederick, Shrewsbury, MA
